Collaborating to Enhance Reputation

Enhancing Employee Engagement & Efficiency

Frontier Unity response

Priority port master planning

- Department of Transport and Main Roads (TMR) is leading priority port master planning for North Queensland ports of Hay Point/Mackay and Abbot Point - working closely with NQBP, local governments, and other key stakeholders
- Public consultation: 17 Oct 2022 – 20 Jan 2023
- TMR reviewing and considering content of submissions
- After all views raised through consultation process have been considered, draft master plan will be updated for finalisation
- For more information, visit TMR website – www.tmr.qld.gov.au

Supporting local jobs

- NQBP welcomed 2 horticultural apprentices and 1 trainee in Feb 2023
 - Apprentices to gain Cert II in Parks and Gardens
 - Trainee to gain Cert II in Horticulture
 - First time offered

Recent recruitment

- Marine Pilot – 30 Jan
- Graduate Engineer – 13 Feb
- Manager Maritime Services – 27 Feb

NQBP's new horticultural recruits - Seumus Andrews, Amber Winbank, and Zoey Tonga, with NQBP Acting CEO Belinda Kenny at the Port of Mackay.

NQBP TRADE UPDATE
Darren Brownsey
General Manager Commercial

~56.3Mt of coal exported from Port of Hay Point (FYTD as at 31 Jan 23)

Hay Point

- January 2023 throughput was ~7Mt – 19% below budget for the month
- Cyclone Ellie caused major disruptions to the coal supply chain during the period
- Market intel suggests demand for Australian coal may increase with recent easing of China's informal ban but not at volumes seen before trade dispute

Mackay

- The Port of Mackay performed stronger than expected in January, handling a total of 292,562t of cargo - a 13% increase year on year
- Grain has had a good season with throughput up significantly

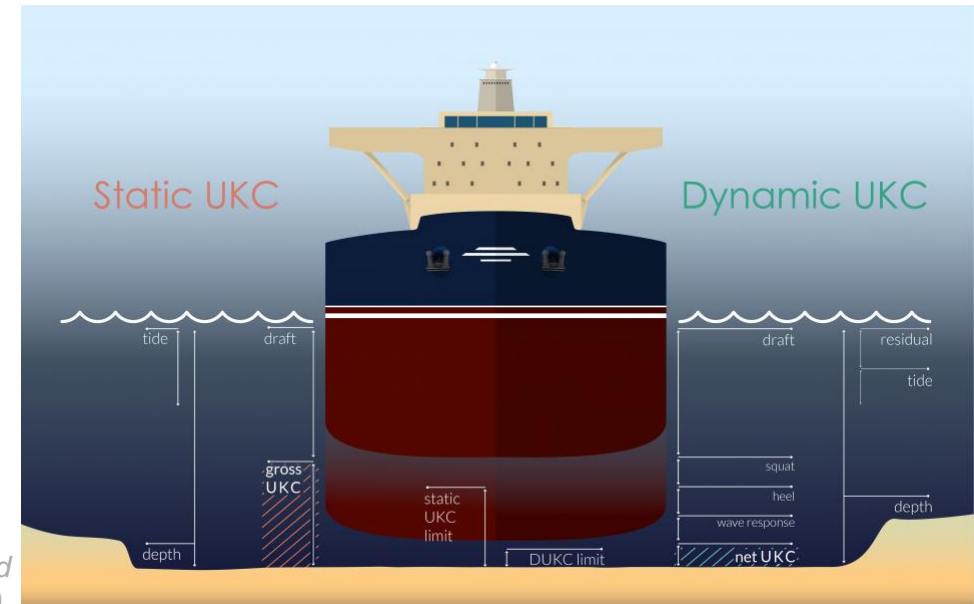

The Port of Hay Point.

 See [NQBP website](#) for latest trade results and general port information.

Major milestone for Hay Point shipping

- 30-year anniversary of Dynamic Under Keel Clearance (DUKC®) at Port of Hay Point
- A paradigm shift in industry's approach to optimising port throughput
- DUKC® calculates the under-keel clearance of each ship in real-time as it transits through a channel, using ship modelling and real-time tidal information
- Benefits:
 - Increased sailing drafts and sailing windows while reducing navigational risk. *A deeper draft equals more coal on each vessel*
 - Prevented groundings
 - Reduced dredging, fuel use and greenhouse gas emissions
- 185,000 transits optimised since 1993

NQBP INFRASTRUCTURE UPDATE

Tim Lewis

General Manager Infrastructure

Half Tide Tug Harbour - cyclone moorings

- Jetty strengthening and additional tug cyclone mooring infrastructure installed
- Three mooring buoys, blocks and chain installed for two line boats
- Project coordinated in close consultation with Hay Point towage and terminal operators

Hay Point lookout signage

- Works to replace aged information signage planned for Mar/Apr
